

Ahmad Hasan Ali

+6282229493159 | ahmadhasanali24@gmail.com | Jawa Tengah, Indonesia

Summary

A software engineer with around three years of professional and internship experience in web development, specializing in back-end development. Highly motivated to advance my career in the back-end space, leveraging skills gained from multiple professional certifications.

Experience

Personal Project

Hydroponic Farm Monitoring System | 01/2026 - Present

- Built a hydroponic farm monitoring application using PHP/Laravel to track plant growth, environmental data, with planned expansion into business transaction tracking.
- Integrated an AI-powered chatbot (via Claude/GPT/Gemini API) capable of answering agrofarming questions and querying system data contextually.
- Designed the AI agent API integration into the backend workflow, feeding system data as context for chatbot responses.

Stevor Express | Surabaya, Jawa Timur

Backend Developer | 08/2024 - 01/2026

- Designed an optimal PostgreSQL database architecture to support evolving application requirements.
- Built and managed cross-platform APIs (Android, iOS, and Web) serving over 1,000 registered users and 100+ active users.
- Established a deployment strategy separating staging and production environments to enhance release quality and stability.
- Implemented zero-downtime deployment mechanisms to ensure system updates are executed without user disruption.
- Strengthened server infrastructure security through security configurations, system hardening, and potential attack mitigation.

CV Gudang Media Perkasa | Surakarta, Jawa Tengah

Web Developer Internship | 02/2023 - 07/2023

- Developed a web-based sales and inventory management platform using PHP, Laravel, and MySQL to streamline partner operations.
- Collaborated within a cross-functional team using a modular development approach, taking full ownership of the Super Admin module to facilitate seamless website maintenance.
- Successfully delivered the core product to completion on schedule, continuously contributing to ongoing feature enhancements and post-launch developments.

Sekolah Vokasi UNS | Surakarta, Jawa Tengah

Web Developer | 09/2022 - 01/2023

- Collaborated in a two-person development team to design and build a modern, high-performance company profile website for the Vocational School of Sebelas Maret University within a 5-month timeline.
- Engineered a multi-tenant content management architecture utilizing PHP (Laravel) and MySQL, enabling over 20 distinct diploma study programs and news publishers to independently manage content.
- Modernized the institution's web infrastructure by introducing a new tech stack and utilizing Git for version control, delivering an optimized platform that remains fully functional with zero downtime to date.

Adhiwangsa Hotel | Surakarta, Jawa Tengah

Web Development Inship | 02/2022 - 08/2022

- Engineered a web-based inventory management system for Adhiwangsa Hotel, specifically designed to automate and optimize the asset tracking and data collection processes.
- Minimized human errors in data logging by implementing robust validation mechanisms, significantly increasing overall data accuracy and reliability.
- Streamlined hotel inventory workflows, indirectly boosting data collection efficiency and providing management with smooth, reliable system operations.

Skills

Linux, PHP, Go, Python, Java, Dart, JavaScript, TypeScript, PostgreSQL, React.js, Node.js, HTML, CSS, Git, Docker, AWS, AI assisted development, Serverpod, OAuth 2, Google Cloud Storage, Firebase, Teamwork, Laravel, Nginx, Traefik

Education

Universitas Sebelas Maret | Surakarta, Jawa Tengah
Teknik Informatika | 08/2023

- Graduated summa cum laude—3.7+ GPA
- Led an event in collaboration with three study programs
- Received Bootcamp Scholarship with 6 month learning React.js and Node.js

Learning X Sparta Coding Club | Jakarta
React.js and Node.js Mastery | 02/2023

- Graduated with the "Most Active Student".
